# Summer Science Opportunities-Internships, Programs & Camps
## 2017-2018

This is a listing of summer science opportunities for students interested in gaining work experience, extending their lab skills &/or going deeper into science!!! This list is provided for informational purposes only, & does not imply endorsement or recommendation by Stanford’s Office of Science Outreach.

## Internships (Paid & Unpaid)
You will find Stanford-sponsored internship programs for HS students online [here](#).

| Arthritis Foundation Summer Science Internship | • 8-week internship for juniors & seniors in Northern California  
• $1,500 stipend  
• Must be US citizen or permanent resident & at least 17 years old  
• Internships at UCSF & Stanford                                                                                                                                                                                                                                                                                                    |
| KP Launch Program                            | • Kaiser Permanente in Oakland & other Bay Area locations  
• 8 weeks, full time  
• Program targets underserved HS students                                                                                                                                                                                                                                                                                       |
| Metropolitan Transportation Commission Internship Program | • Introduces HS students to career opportunities in the field of transportation via internships with MTC’s transportation partners (such as traffic engineers at city & county public works departments or planners at transit agencies)  
• Must be 16 years of age by mid-June, have completed 10th grade, & live in the county in which project is located                                                                                                                                                                                                                         |
| NASA Internships for HS Students              | • Paid summer internships for HS students in a variety of disciplines from engineering & science to technology, business, & finance  
• Must be US citizen & at least 16 years old                                                                                                                                                                                                                                                                                      |
| Research Science Institute @ MIT             | • 6-week residential program for US & international HS students who are rising seniors  
• No cost to participate but very competitive.  
• Includes: Research Internships, Extracurricular Activities & Lecture Series                                                                                                                                                                                                                                                     |
| Science & Engineering Apprenticeship Program (SEAP) | • 8-week internship at a Department of Navy lab  
• Participating labs all over the country  
• Must be 16  
• $3,300 stipend but no travel/relocation allowance provided                                                                                                                                                                                                                                                                       |
| Science Internship Program @ UCSC             | • 8-week research experience in a UCSC lab  
• Housing provided (for fee) or students commute from home  
• Must be 14 years old (16 for some projects)  
• Cost to participate                                                                                                                                                                                                                                                                                                               |
| Careers in Science Intern Program @ Cal Academy | • For 9th - 12th graders  
• Internship takes place at the California Academy of Sciences  
• Afterschool and weekends  
• Multi-year, year-round participation                                                                                                                                                                                                                                                                                         |
| Summer Science Intensive (I-CLEM)            | • 8-week paid summer internship program  
• For low income East Bay sophomores & juniors who are 16 years old & interested in learning about biotechnology  
• Interns receive a stipend  
• Placements are in Emeryville at Joint BioEnergy Institute |
<table>
<thead>
<tr>
<th>Program</th>
<th>Brief Description/Eligibility Requirements</th>
</tr>
</thead>
</table>
| **Teen Environmental Education Mentorship (TEEM)** | • An environmental education internship & leadership program for San Francisco/Marin HS students  
• Gain first-hand knowledge about the field of environmental education through field trips, one-on-one mentorships & by leading interactive activities with elementary students |
| **UC Davis-Young Scholars Program**           | • 6-week summer residential internship program  
• Focus on biological, environmental & agricultural sciences  
• Must be rising junior or senior  
• Tuition $6,500 |
| **UCSF Summer Internship**                   | • Two programs offered for San Francisco public HS sophomores & juniors who are nominated by a science teacher at their schools:  
• **HS Intern Program** (for current juniors) – students work with a mentor in a lab at one of the UCSF campuses in a paid summer internship immersed in laboratory-based biomedical research  
• **San Francisco Health Investigators** (for current sophomores) – students engage in a public health research project to investigate issues important to the health of their communities & develop targeted messaging campaigns addressing these issues. The project begins in the summer & continues into the following school year |

### Academies (long-term programs)

<table>
<thead>
<tr>
<th>Program</th>
<th>Brief Description/Eligibility Requirements</th>
</tr>
</thead>
</table>
| **Exploratorium Explainers Program**         | • Students engage with visitors, perform demos, & participate in museum operations in the afternoons, on weekends, & during the summer  
• Must be at least 15 years old  
• Work for pay June-September |
| **SMASH-Summer Math & Science Honors Academy** | • 3-year program starting with current 9th graders, including 5-week residential component at Berkeley, Stanford, UCLA, UC Davis or Morehouse  
• Reside in SF Bay Area  
• Self-identify as: Latino/Hispanic, African American, Native American, Pacific Islander or underrepresented Asian |
| **Teen Advocates for Science Communication**  | • Youth (8th-12th grade) volunteers in the TASC Force at California Academy of Science  
• Design & present youth-created educational programs to the public  
• Weekends during school year; summer program also |
| **Upward Bound Math & Science Program, UC Berkeley** | • Free program that supports HS students in their preparation for college entrance  
• Targets students from low-income families who are the first in their families to go to college.  
• School year & summer activities, including 6-week residential component |

### Science Summer Schools, Camps & Workshops

*Updated November 2017 by Stanford University Office of Science Outreach, oso.stanford.edu*  
*Please send corrections & additions to mbruhi@stanford.edu*
You will find Stanford-sponsored *summer school* programs, *seminars & workshops* for HS students on the Office of Science Outreach website. Follow the links for more information about each offering.

</thead>
</table>
| DEEP Summer Academy @ University of Toronto | • For HS students around the world interested in engineering  
• 1-4 weeks in July  
• Students pay $500 to $2000 Tuition depending on whether they live on campus. |
| Education Unlimited Computer Camp | • For tech-savvy students who love programming, gaming & web design  
• Instruction in creative & practical computer skills  
• Workshops at Stanford & Berkeley |
| EMBARC Summer Design Academy | • 4-week design academy for HS students held at the College of Environmental Design (CED) at UC Berkeley  
• Focus on architecture, urban design & city planning |
| Golden Gate National Parks Conservancy Leadership Programs | • Various programs focused on leadership, habitat restoration, summer camp counselors, & trail building |
| Johns Hopkins University Engineering Innovation Program | • Students learn engineering basics, conduct experiments, take part in design challenges, & meet with research engineers  
• Programs are held at multiple locations in CA & East Coast  
• $2,700 tuition plus residential fee |
| Microsoft's DigiGirlz High Tech Camp | • Microsoft hosts 2-day camp for girls  
• Many locations around the country  
• Tuition is free but participants are responsible for transportation & lodging |
| MIT Women's Technology Program | • 4-week summer academic & residential experience for girls  
• Focus on EE/CS or Mechanical Engineering  
• Hands-on classes, labs & team-based projects  
• For rising seniors  
• Fee of $3,500, some financial aid available |
| Research Apprenticeships in Biology @ Cornell | • Summer residential program  
• Rising juniors, seniors or fist year undergraduates  
• Tuition & room/board |
| Smith College (MA) Summer Science & Engineering Program for HS Girls | • Girls grades 9-12  
• 4-week summer residential program  
• Charges tuition & room/board |
| Summer Engineering Seminars @ Santa Clara University | • 1-week summer residential program  
• For rising juniors or seniors  
• No cost to participate; targets underserved students |
| Summer Focus at UC Berkeley | • A 4 or 6-week program in partnership with Education Unlimited  
• Students take one UC Berkeley course plus 2 enrichment courses  
• Tuition & room & board charged |
| Summer Institutes for the Gifted | • 3-week summer residential sessions  
• For students ages 9-17  
• Located at prestigious college campuses nationwide  
• Commuter option available at most locations  
• Tuition & room/board charged |
| Summer Marine Lab Experience for HS Students @ USC | • One week program for HS students at Catalina Island to explore the Earth’s ocean  
• Entering 9th, 10th or 11th grade  
• Must be US Citizen or have resident status  
• Underrepresented & first-generation students encouraged to apply |
| UC Berkeley Academic Talent Development Program (ATDP) | • Summer classes in Berkeley for highly motivated students in grades 8-12  
| | • Courses include computer science, natural science & other  
| | • Fee to enroll  
| UC COSMOS: Summer Math & Science Programs | • Summer residential program at UC Davis, UC Irvine, UC San Diego & UC Santa Cruz  
| | • Each campus has different focus area  
| | • $3,545 in-state tuition, including room/board, more for out-of-state students  

---
